Madison AI™

CLIENT
City of Chanhassen, MN

LOCATION: CHANHASSEN, MN | POPULATION: ~26,000 | GOV TYPE: FULL SERVICE CITY | STAFF SIZE: ~85 EMPLOYEES

AI-POWERED KNOWLEDGE MANAGEMENT

Retiring Staff Took Decades of Knowledge. Madison AI Brought It Back and Saves 60+ Staff Hours Every Month.

60+ hrs	658	106	39
SAVED EVERY MONTH	AI-ASSISTED CONVERSATIONS	CODE LOOKUPS RESOLVED	STAFF REPORTS DRAFTED

THE CHALLENGE

With only 85 full-time staff, Chanhassen couldn't afford to lose hours digging through PDFs, tracking down institutional knowledge, or writing reports from scratch. Then four senior planners with 25+ years of combined experience retired. Decades of knowledge walked out the door, and the remaining team needed a way to keep up.

THE SOLUTION

Madison AI built a custom AI assistant trained on Chanhassen's own documents: municipal code, council minutes, planning records, and contracts. Staff now draft reports in 30 minutes instead of 6 hours, look up code regulations instantly, and research historical decisions without digging through archives.

> "Instead of relying on someone who was basically a human encyclopedia, **we can use Madison AI to search and retrieve that information instantly.** Something is about to change with our workforce."

Matt Unmacht
Assistant City Manager, City of Chanhassen

WHAT STAFF USE MADISON AI FOR

Municipal Code Lookups

Staff get answers to code questions in seconds, from fence heights to burn permits, instead of searching through manually.

Staff Report Drafting

Reports that used to take 4-6 hours are now drafted in about 30 minutes with citations from historical documents. (5.9% of usage)

Research & Institutional Knowledge

Historical decisions, project timelines, and past council actions retrieved instantly instead of digging through archives.

Infrastructure & Public Works

Questions about roads, parks, stormwater, and utilities answered on the spot, from rec center history to right-of-way rules.
