## HOW CAN GOVERNMENT TEAMS USE AI?

### General-Use AI
Claude, ChatGPT, Perplexity

- **Draft & Summarize**
  Emails, memos, and communication documents
- **Analyze & Compare**
  Spreadsheets, data from other jurisdictions, and research across topics
- **Brainstorm & Plan**
  Strategy sessions, project outlines, and policy ideas

### Purpose-Built AI
Madison AI

- **Draft Staff Reports**
  In your city's language, tone, and required format
- **Uncover & Electrify Institutional Knowledge**
  Research council actions, contracts, policies, and past decisions
- **Draft Minutes, RFPs & Other Docs**
  The important but time-intensive documents for your city

## HOW TO GET STARTED - ANATOMY OF A GREAT PROMPT

**Context**
Your role, audience, org size, and constraints.

**Goal**
What do you want? Lead with a clear action verb.

I'm a city manager preparing for a budget workshop. Summarize the key takeaways from this 40-page staff report into a 5-minute talking points memo. Highlight risks, opportunities, and recommended next steps based on the attached staff report.

**Expectations**
Format, length, structure, and requirements.

**Source**
Data, uploads, or docs the AI should reference.

## PRO-TIPS FOR ACCURATE OUTPUTS

### Be Specific
Include your role, audience, and desired format. Vague prompts get vague answers.

### Set a Role
Tell the AI who to be. "Acting as a city budget analyst, explain..." produces sharper results.

### Talk, Don't Search
Write full sentences with context, like you're briefing a capable new colleague on day one.

### Iterate & Refine
First result not right? Give specific feedback and try again. AI improves with direction.

### Always Verify Output
AI can sound confident and still be wrong. Review every output before sharing or acting on it.

### Never Upload Sensitive Data
No PII or confidential documents to unapproved tools. Use only secure, vetted platforms.

## THE ETHICS CHECK

- **No PII**
  Does this contain personally identifiable information?
- **Public Test**
  Would I be comfortable if this were public?
- **Bias Check**
  Could the output reinforce stereotypes?
- **Human Review**
  Will I validate before using or sharing?
- **Approved Tool**
  Am I using a secure tool for this data?
- **Enhance, Don't Replace**
  AI supports my work, does not replace it

Your Government's AI Built from Your Institutional Knowledge and Data.

Safe.

Secure.

Only your data.
