How Nevada's Capital City is Reclaiming 140 Staff Hours a Month with AI

CARSON CITY NEVADA

$10,107	140 hrs	355	44
AVOIDED ADMIN COSTS PER MONTH MONTH	STAFF HOURS RECLAIMED PER MONTH	RESEARCH CONVERSATIONS	ACTIVE USERS

THE CHALLENGE

As a consolidated municipality, Carson City's staff juggle city and county functions — from Board of Supervisors actions to zoning code and public works. Critical knowledge was scattered across minutes, budget documents, and long-tenured employees, making routine research time consuming.

THE SOLUTION

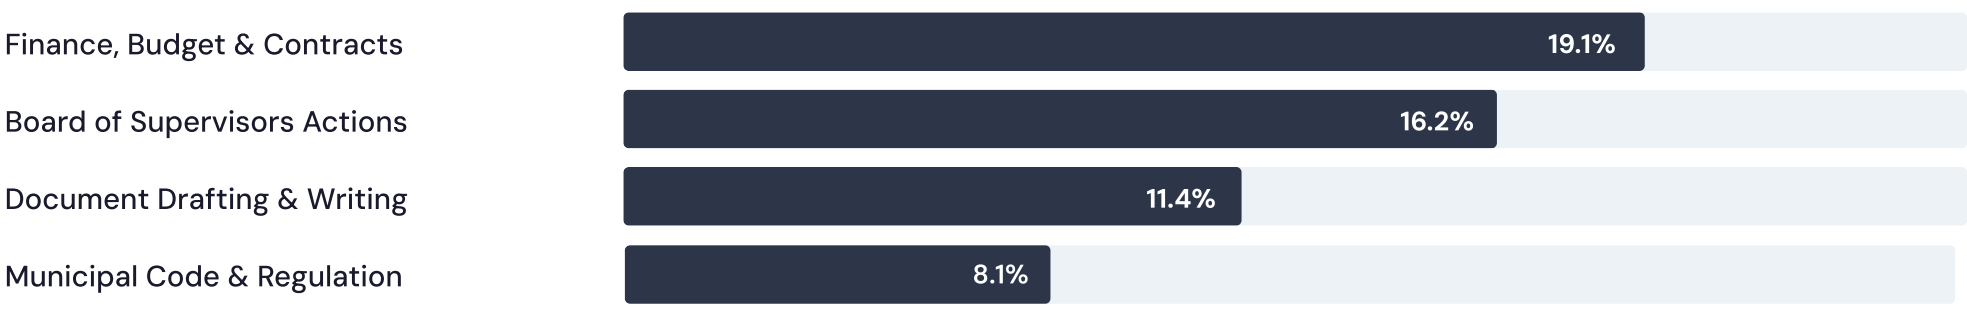

Madison AI deployed a knowledge assistant trained on Carson City's internal document library. Staff now instantly query board actions, municipal code, budget data, and master knowledge — reclaiming hours previously spent digging through archives and waiting for answers from colleagues.

> "Instead of digging through years of agendas and transcripts, I asked Madison AI to find a specific board discussion on road acceptance — and kept narrowing until I had exactly what I needed."

Stephanie Hicks
Deputy City Manager
Carson City, NV

WHAT CITY STAFF SEARCH FOR MOST

Board of Supervisors Research

Staff search past board actions, motions, and directions in seconds instead of combing through years of archived minutes.

Budget & Contract Lookup

Pulls fund balances, agreement terms, and grant details on demand for finance and administrative teams.

Document Drafting & Writing

Staff draft talking points, justification narratives, and vision statements grounded in Carson City's own plans and board history.

Municipal Code & Regulations

Instantly references CCMC sections, ordinances, and regulatory requirements for planning and public works staff.
